

Reason UL 12/10/76 1-1-76

- A-76 is fundamentally a procurement matter (driven by Office of Federal Procurement Policy)
- the required inventory of commercial & industrial activities must, with the assistance of individual offices, be conducted & managed centrally - LOG is most logical (i.e. tie-in with Service contracts over \$100K F/A)
- ZFPs solicited for competition with in-house activity must be issued & evaluated by OL - also tie-in with of/SS required -
- appeals mechanism w/public re A-76 must involve procurement law & procurement personnel (i.e. LOG)
- LOG is now focal point for truly unsolicited proposals ~~the~~ qualified bidders lists etc - A-76 merely an extension of the above, albeit a large extension (i.e. focal point)
